

# SONOS // The Cheney Place

## 1. CREATE PLAYLIST(S)

Create playlist(s) on your phone before arriving for your event. For ease of use, we encourage you to create the playlist on your phone using iTunes or your music library.

We have the Sonos system available in our Bridal Suite as well as on the second floor for Cocktail Hour, so you may want to consider making multiple playlists.

## 2. INSTALL SONOS APP

Install the Sonos Controller App on your smartphone.

iPhone: Sonos Controller

Google Play/Amazon: Sonos Controller for Android

## 3. CONNECT TO OUR NETWORK

Once you're at our event, you'll need to connect to our "TCP" Wifi network. This is a private network so please see your event supervisor to get logged on.

## 4. CONNECT SONOS TO OUR NETWORK

- Make sure you're connected to the "TCP" Wifi.
- Open your Sonos App
- Click "Connect to Existing System"
- Click "Next" and "Finish" to connect
- To access your music and playlists, click "On This Phone."
- To use playlists we've created, click "Sonos Playlists"

## 5. SELECT ROOM

Select which room you'd like to listen to the music in by selecting a room from the drop down list located at the top/center of your screen.

If you don't see "Bridal Suite" as an option, please make sure both light switches are on in the bridal suite as one of those switches also powers the speaker.

For "Cocktail Hour," both "Cocktail Center" and "Cocktail S + Sub" need to be grouped together. Click "Group," select both options, and then click "Done."

Now you can return to the menu and select a playlist to play for your cocktail hour.

Please contact the event supervisor if you have any questions!!
